

Proposed Additions to Statistics Glossary

These 40 modern econometric/causal inference terms would be added to the glossary with source marked as “Added by Lodefalk”. Review and annotate before building the page.

#	English	Swedish	Notes
1	average treatment effect (ATE)	genomsnittlig behandlingseffekt	
2	average treatment effect on the treated (ATT)	genomsnittlig behandlingseffekt på de behandlade	
3	bunching estimator	tröskelskattning (bunching)	
4	causal forest	kausal skog	
5	causal inference	kausal inferens	
6	complier average causal effect (CACE)	genomsnittlig kausaleffekt bland följare	= LATE
7	conditional average treatment effect (CATE)	villkorlig genomsnittlig behandlingseffekt	
8	counterfactual	kontrafaktisk	
9	debiased machine learning	avbiasad maskininlärning	
10	difference-in-differences (DiD)	differens-i-differenser	
11	directed acyclic graph (DAG)	riktad acyklisk graf	
12	double machine learning (DML)	dubbel maskininlärning	
13	event study	händelsestudie	
14	exclusion restriction	exklusionsrestriktion	
15	fuzzy regression discontinuity	otyddlig regressionssprångdesign	
16	heteroskedasticity	heteroskedasticitet	
17	heteroskedasticity-consistent SE	heteroskedasticitets- konsistenta standardfel	
18	homoskedasticity	homoskedasticitet	
19	intention-to-treat (ITT)	avsikt-att-behandla	
20	inverse probability weighting (IPW)	invers sannolikhetsviktning	
21	local average treatment effect (LATE)	lokal genomsnittlig behandlingseffekt	
22	machine learning	maskininlärning	
23	natural experiment	naturligt experiment	
24	omitted variable bias	utelämnad-variabel-bias	
25	parallel trends assumption	antagande om parallella trender	
26	placebo test	placebotest	
27	pre-trend test	förtrendtest	
28	propensity score	benägenhetspoäng	
29	propensity score matching	matchning med benägenhetspoäng	
30	randomised controlled trial (RCT)	randomiserad kontrollerad studie	
31	regression discontinuity design (RDD)	regressionssprångdesign	

#	English	Swedish	Notes
32	regression kink design (RKD)	regressionskröksdesign	
33	sharp regression discontinuity	tydlig regressionssprångdesign	
34	staggered adoption design	stegvis implementeringsdesign	
35	staggered difference-in-differences	stegvis differens-i-differenser	
36	synthetic control method	syntetisk kontrollmetod	
37	treatment effect heterogeneity	heterogenitet i behandlingseffekter	
38	triple differences (DDD)	trippeldifferenser	
39	two-way fixed effects (TWFE)	tvåvägs fixa effekter	
40	weak instrument	svagt instrument	

Decision key

Mark each row with one of: - **OK** — keep as is - **FIX** — correct the Swedish translation (write correction next to it) - **DROP** — remove from list - **ADD** — write new terms at the bottom
